

SUNLAND WATER DISTRICT

Commissioners Meeting

August 2016

Manager’s Report by Mike Langley

~~~~~  
~~~~~

Financial Report by Celeste Lilley

Water Reclamation Facility

- The Hurricane Aerators have been picked up and are on their way back to the manufacturer.
- SWD has received the new final invoice from BHC, but will not pay that until receiving reimbursement of \$14,400 less shipping for the Hurricanes from WRL.
- Mike Cays and Rich Sleeper attended a PNCWA workshop in Port Orchard and toured the Poulsbo wastewater treatment facility.
- Mike and Rich are emptying and cleaning out the new pre-eq basin. This is the first time for this operation. It’s so easy to forget, we didn’t have this option with the facultative lagoon, ever!!

Water Meters/Meter Setters

- Scott continues to work on a regular schedule of regular activities.
- Right now this is primarily in Div. 7. We have two multifamily buildings left in that neighborhood, both challenges. Two or three large irrigation meters/setters need to be installed in this division.
- Scott installed a 2” irrigation meter in division 16

Water Production/Consumption Results

- The total water pumped in 2014 was 84,754,836 gallons.
- The total water pumped in 2015 was 81,965,860 gallons.

- The static water level in the 250 foot well No. 1 averaged **81 feet** for May while the pumping water level for that well averaged **95 feet** for the same period.
- The static water level for the 129 foot well No.2 averaged **15 feet** for May while the pumping water level for that well averaged **24 feet** for the same period.

Other

- SWD has received notice from the Clallam County Hearing Examiner. The Conditional Use Permit for the construction of an office building adjacent to the lower reservoir has been approved. This approval triggers the review of the building permit, which could take another two to four weeks.
- SWD is continuing to interview and try out individuals to fill the water operator vacancy. We've tried out three individuals so far, and we're still seeking interested persons.
- SWD personnel will be digging up and repairing the sewer main at Park Place next week.
- SWD personnel are still working on the humidity control system for the upper reservoir.
- There is a water leak near the loading bay at the club house. The golf course maintenance crew have been working on that.
- I've found a business in PA that can sharpen the cutter teeth for the grinder pumps at some of our sewer lift stations. If this works it could save a large chunk of change. The cost for new cutters and teeth is \$600-\$700. We paid \$25 for sharpening
