

SUNLAND WATER DISTRICT

Commissioners Meeting

September 2015

Manager's Report by Mike Langley

~~~~~  
~~~~~

Financial Report by Celeste Lilley

Water Reclamation Facility

- The two Aquajet Floating Aerators have been delivered and are on site. SWD personnel will next be removing the two Submersible aerators, storing them in the barn, and installing the floating aerators in the new digester.
- John Tucker of Straits Electric is wiring in the new turbidity meter for the additional reclaimed water filter.
- Jay Griffith is painting the new pre-eq basin pumphouse.
- I contacted the Department of Ecology regarding the status of our WRF O&M manual and other documents that are currently under their review. To date they have not responded to my inquiry. I will contact them again to get an update before our October meeting.
- I contacted L&I regarding the Ceccanti retainage and they informed me that there remains an unresolved issue with that. I contacted Ceccanti and they are dealing with it. So, we are still holding that amount of the Ceccanti contract.
- BHC is trying to get reimbursement for the return of the submersible aerators. We are still holding the final invoice from BHC.

location. We'll also have two rebuilt pumps in inventory for use when needed. The cost for this repair will run around All cost for all this will be around \$10,000.

- No surprises from the lead and copper testing. None of the homes tested at SunLand showed any measurable amounts in their water. As required by DOH, I will be sending test results to all homes tested.
