

SUNLAND WATER DISTRICT

Commissioners Meeting

September 2016

Manager’s Report by Mike Langley

~~~~~  
~~~~~

Financial Report by Celeste Lilley

Water Reclamation Facility

- SWD has received the \$13,000 for the return of the Hurricane Aerators.
- SWD will now pay the final invoice from BHC.
- Rich Sleeper has completed his on the job experience requirement as well as his educational requirement and is submitting his application for examination for Wastewater Operator in Training Certification.
- The emptying and cleaning of the pre-eq basin is complete. The good thing about doing this is that it gave us the opportunity to empty out all the solids and clean out the basin as well as check the concrete for cracks and leaks. We found no cracks and no leaks.
- SWD is again receiving the “Wastewater Treatment Plant Outstanding Performance” award. Kudos for Mike Cays and Rich Sleeper!!

Water Meters/Meter Setters

- Two units are all that remain to be metered in Division 7.

Water Production/Consumption Results

- Our well water levels remain unchanged.

Other

- I am preparing an employment offer for a fellow from Virginia. He is interested in relocating here and holds high level water certifications.
- SWD personnel repaired the leaking sewer main at Park Place.
- SWD personnel are still working on the humidity control system for the upper reservoir.
- There is a water leak near the loading bay at the club house. The golf course maintenance crew are working on that.
- The Washington Dept of Health conducted a sanitary survey of the SunLand Water System on August 29 and found no problems at all. They are recommending that the district install fixed safety ladders in all reservoir cells in the future. We should be getting a written report from that visit soon.
