Manager’s Report by Mike Langley

Financial Report by Karen Shay

Water Reclamation Facility

- Mike and Rich have been cleaning, painting, and spiffing up all the buildings and equipment at the treatment plant. Call Mike at 360-683-3880 for a tour of the facility.
- SWD will be purchasing some replacement equipment that is far beyond its life expectancy at the water reclamation facility.

Water Meters/Meter Setters

- Scott has installed two more water meters/setters on Hogans Vista.
- SWD personnel will be in front yards reading water meters very soon. Remember, we’ll be reading the meters for a year and interpreting the data before the District actually goes to billing for water by consumption.
Water Production/Consumption Results

- Static water levels in the groundwater wells have risen slightly as we’ve moved into the wetter season.

Other

- Judy is back to work in the District office. The office hours at the new location at 5762 Woodcock Road are from 9AM to 1PM M-F.

- SWD has installed a drive through at the office to make it easier to get in and out.

- SWD personnel have installed a replacement production water meter at well number one.

- The District water crew has been doing a lot of maintenance work on both water reservoirs.

- The District has submitted Nitrate samples from the water distribution system for analysis. High Nitrate levels in well water can be an indication of septage seeping into the water source. Elevated levels of this element have never been detected at SunLand, but we still have to test.

- The District recently became aware of a new home being built on a lot with no apparent sewer service line. Following a week of research, a plan was formulated to resolve this issue. The new homeowner was relieved to receive this good news.
• SWD will be conducting a financial audit with the state auditor’s office in January.

• Dutch shut off and locked out the water service to David Underwood’s residence on SunLand Drive as per his request.

• Delivered annual lease payment for spray field to Mark Sundt.

• An APSCO representative toured the SunLand sewer lift stations and will be providing the District with proposals for long term improvement options.

• At approximately 2 PM on October 27 Clallam County Roads Department personnel drove a street sign post through the middle of a 6” water main at 11th Court in SunLand. SWD personnel responded immediately and had the damaged line exposed, repaired and the water service restored by 5PM. At 6PM an advisory boil water notice was emailed to all addresses on file and all homes in the vicinity of the break were notified in person, or a note left at the address. The District is currently in the process of establishing a mechanism for communicating special announcements to customers.
