Manager’s Report by Mike Langley

Financial Report by Karen Shay

Water Reclamation Facility

- Arrow Septic pumped out the main lift station. We try to do this every six months to prevent large accumulations of sand, gravel, rocks and other non-consumables from building up and damaging pumps and other equipment at the lift station and/or the treatment plant.
- Mike Cays and Rich Sleeper have been working very hard at keeping the treatment plant operating smoothly over the last couple of weeks. The truck we use to haul sludge to Sequim has been in the repair shop for brake work. We have it back, but were told by both mechanical firms we deal with that we need to get a different truck. So, that will need to be included in a near term budget for the District.

Water Meters/Meter Setters

- SWD personnel will be in front yards reading water meters very soon. Remember, we’ll be reading the meters for a year and interpreting the
data before the District actually goes to billing for water by consumption.

- Scott repaired a water service connection at 200 Cascadia Loop.

Water Production/Consumption Results

- Static water levels in the groundwater wells have risen slightly as we’ve moved into the wetter season.

Other

- Water/sewer bills for 2018 have been sent out.

- Harry Wonder of B&W Power, Inc. performed all the regular maintenance on our emergency generators. Dutch Williamson replaced two cooling thermostats at the lower reservoir emergency generator site.

- Scott has been working with the county road crew making sure they don’t hit any more of our water mains while installing new road sign posts.

- The District water crew has begun the repairs on the upper reservoir.

- The District has received the results of the Nitrate samples taken from both wells. Those came back well within the WSDOH limits.
- Dutch is continuing to map all sewer man holes, sewer clean outs, water main isolation valves, and water meter boxes within the SunLand service area.

- I sent an email to Congressman Derek Kilmer requesting him to remove section 5001 from H.R.1 and to preserve the non-taxable status of the investments of state and local governmental retirement plans.

- SWD personnel moved a water service for a new building in Division 17 East.

- SWD will be receiving proposals from APSCO for repairs/replacement of all sewer lift stations at SunLand. These pump stations need to be included in the District’s long range plan.
