

SUNLAND WATER DISTRICT

Commissioners Meeting

February 2019

Manager's Report by Mike Langley

~~~~~  
~~~~~

Financial Report by Karen Shay

Water Reclamation Facility

- The line floc tank/alum blockage problem has been cleared and the filtration system is back to normal operations.
- Rich has taken and passed the water operator exam. Good job Rich! He will be taking a class later this month to prepare for the level II Wastewater Treatment Plant Operator Certification Exam.

Water Meters/Meter Setters

- Scott has just completed the 12th water meter read for all of SunLand. The District is continuing to iron out the wrinkles in this process. The next water meter read is planned for the first week in March.

Water Production/Consumption Results

- Static water levels in the groundwater wells are normal for winter.

- Total water production in January of 2018 from both sources was 2,435,322 gallons.

Other

- Mike Langley will be participating in a WASWD workshop about the removal of Pharmaceuticals and Personal Care Products (PPCP's) from the wastewater stream. The workshop will take place at the WASWSD offices in Tukwila.
- SWD personnel are searching for a replacement backhoe. The old unit we have was inherited from the developer and is far beyond its useful life.
- SWD personnel are continuing work on improvements to the water shop and barn.
- Karen and Judy participated in a professional ethics workshop.
- SWD personnel are contacting customers whose water consumption has been significantly higher than the average for SunLand. Higher than average consumption readings may be an indication of a water leak.
