

SUNLAND WATER DISTRICT

Commissioners Meeting

February 2020

Manager’s Report by Mike Langley

~~~~~  
~~~~~

Financial Report by Karen Shay

Water Reclamation Facility

- Willy is continuing to work with Al Friedli at Evolution Controls to develop a scada system and replace the paper chart recorders at the WRF.
- We have replaced the old microscope at the WRF. The new one will have a camera attachment and will be connected to a computer so we can share/send photos of what we’re viewing.
- Willy and Rich are continuing remodeling and re-organizing at the WRF lab.
- The crew at the WRF is evaluating options for replacing the air blowers for the SBR’s. These blowers provide the extra air needed by the bugs consuming the waste.
- And the WRF team is replacing other lab equipment that has passed their end of useful life.

Water Meters/Meter Setters

- The next water meter read is planned for the first week in March.

Water Production/Consumption Results

- The water level in both wells is normal.
- Total water production numbers continue to baffle us, as they continue to be much higher than expected. Dutch and Jay have tested the meter on well no. 1 and it appears accurate. The meter on well no. 2 is a turbine and it can only slow down, giving us low production numbers, not high. At this point we are looking at a significant leak or water theft.

Other

- SWD personnel will be placing a temporary barrier in front of the sewer lift station on Taylor blvd. to protect it from traffic.
- SWD has replaced two computers in the administration building.
- SWD personnel will be draining, cleaning, and refilling both water reservoirs in the next few weeks.
- CA Homes is building another house, this one on Williams Place.
- I was able to rescue more records pertaining to SunLand from the NTI engineering firm in Port Angeles.
