

SUNLAND WATER DISTRICT

Commissioners Meeting

December 2020

Manager’s Report by Mike Langley

~~~~~  
~~~~~

Financial Report by Karen Shay

Water Reclamation Facility

- Willy and Rich are continuing to test for Covid-19 at the WRF. SWD received a positive result report from a weekly sample of the influent at the WRF but received a negative result the following week. For a period of time SWD will be sending in samples taken from the WRF influent as well as the WRF effluent to determine if the treatment process kills the virus.
- All of SunLand experienced a three-hour power outage on November 17.
- The forty-year-old manual irrigation system at the WRF spray field will be replaced with a new wheel line irrigation system next year.
- Rich Sleeper of SunLand and SWD is now a certified Water Distribution Operator and is gearing up to be the District’s coliform bacteria sampler. Thanks, Rich, for stepping up to take on this most important responsibility. Rich volunteered to install a sample station at his residence here at SunLand.

-

Water Production/Consumption Results

- The next water meter read is planned for the first week of January.
- The water level in both wells is normal for the winter months.
- Total water production numbers continue to appear high. We are continuing to look for leaks or other reasons for high production. Scott is investigating some irrigation that may not be metered.

Other

- The emergency generator for lift station #3 has been installed and awaits final electrical work and start-up.
- Rocky was attacked by two customers. One of whom called me to let me know how much they appreciated his calming and professional manner.
- The District is still working on a solution to a ruff running generator at the upper reservoir/pressure system.
- SWD has a new customer connected to water and sewer at 11th Court.
