

SUNLAND WATER DISTRICT

Commissioners Meeting

May 17, 2022

Manager’s Report by Brian Scott

~~~~~  
~~~~~

Financial Report by Karen Shay

Water Reclamation Facility

- Willy and Rich put the new pump for the blower back in service and it is running well.
- Lab test and monthly reports were submitted to the Department of Ecology (DOE).
- 17 loads of sludge were taken to the City of Sequim plant (22,400 gallons 2.72% solids).
- Willy submitted the O&M report for the DOE that was due May 15th.
- Rich did lab performance testing. Results are in and we passed with flying colors.

Water Production/Consumption Results

- The next water meter read will be the first week of June.
- The water level at lower well is 77 ft. and upper well at 14 ft. Water loss for the month of March is 22%
- Total water production numbers are starting to move up. Staff continue to look for leaks.
- SWD staff worked on cleaning and mowing the upper and lower reservoirs. Reports are all good.
- SWD staff completed a system flash of the waterlines.

- SWD Manger hired Joe Beeson as Utility/Maintenance Worker. Joe previously performed landscape maintenance for the SunLand Golf and Country Club.
- SWD staff is working on the barn between other projects.
- SWD staff discussed the correct location of the property line with a homeowner at the upper reservoir. SWD found the property corners and ran a string to show the property line between SWD property and his property. Homeowner is satisfied.
- Brian, Scott and Rocky were invited and attended a Division 17 Board meeting this month in order to explain the State of Washington's Cross Connection Control (Backflow Prevention) rules and regulations and the need for Backflow Prevention Assemblies (BPA's) for all underground sprinkler systems and the State requirement for annual testing.
